

## Linux – Installation Guide

1. Insert the e-banking CD-ROM into your CD-ROM drive.
2. Open the folder "Applikation/Linux" from your CD-ROM drive.
3. Copy the file "e-banking\_en.tar.gz" on your hard-drive (desktop).
4. Double-click the file "e-banking\_en.tar.gz" to unzip it into your user home-directory.
5. Change into the home-directory and then into the new folder "vpbank-ebanking".
6. Start the installation process by double-clicking the installation file "install.sh".
7. Start the e-banking application with a double-click on the e-banking icon at the desktop.

### Note

In KUbuntu you have to do a single-click instead of a double-click.

When installing e-banking for Fedora Red Hat Linux FC 6, an additional library has to be installed. For that purpose you need to type a command into the terminal window. The following command has to be processed as root (type "su-root" into the terminal window):  
yum install libXp
